DETAILED ACTION

EXAMINER'S AMENDMENT

1. Applicant's election of Species of Figure 3D, claims 1-7, 9-11, 18-19 and 24 in Paper No. 0803 is acknowledged. Because applicant elected without traverse, therefore, non-elected claims 8,12-17, 20-23, 26-32 and 34 are now cancelled.

Allowable Subject Matter

2. Claims 1-7, 9-11, 18-19, 24-25 and 35-36 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1, 24 and 36 recite, inter alia, "a package coupled to the probe elements so that the probe elements extend external to the package, wherein the package includes at least one die with active electronic components electrically connected to the probe elements, and at least one coolant port that allows a coolant to enter the package and cool the active electronic components of each die during a test operation."

Applicant's arguments base on the above limitations overcome the office action mailed on 06/08/2004. In addition, the coolant directly cools active electronic components on dies; this way, the present invention reduces the magnitude of thermal gradients across each die and makes remaining thermal gradients more even across each die; hot spots are also reduced or eliminated.
